

CREATE Your Own PROFESSIONAL WEBSITE

It is important for any business to have an easy to use, informative website. There are many things to consider including content, purpose, cost and management. There are also many common mistakes that people make that can end up wasting a lot of money and time. This course is run by Justin Williams from iXplainIT who trains people and organisations in building and maintaining their own websites.

This short course will show you how to select and register a web domain name, choose a website builder, plan and design the layout of the website and put it up online. We look at creating online stores, linking it to your social media and including downloadable content.

This is the perfect opportunity to learn how to easily build your own website in a simple plain English style without having to know anything about coding.
